Setting Up Your Almy Pivoting-Top Advent Candelabrum

Install the candelabrum top on your stand as shown in the assembly instructions for Almy Brass Floor Standing Appointments, enclosed.

REMOVE THE SMALL RUBBER SHIMS from under the bottom of the double-bar cross arms where they meet the perimeter ring of the candelabrum. These shims protect the candelabrum top from damage during shipment. Pivot the candelabrum ring down slightly to loosen the shims and remove them.

ADJUST TIGHTNESS OF PIVOT. When you receive your candelabrum, the factory setting should be loose enough to allow you to pivot the fixture, but tight enough to hold its position when candles are installed. If you need to adjust the tightness, use a flat screwdriver to tighten or loosen the screws in the finials at either end of the double-bar cross arms.

Thank you.
